Disease Model Calibration

Ankur Pandya, PhD
Assistant Professor of Public Health
Division of Health Policy
Department of Public Health at Weill Cornell Medical College

Learning Objectives:
- Implement the main phases of model calibration (for any calibration exercise)
- Identify modeling situations that might require “advanced” calibration methods
- Consider the tradeoffs between simple vs. complex calibration methods

There will be a hands-on exercise so please plan to bring your PC laptop with a recent version of Excel (2007 or later). Unfortunately, the exercises do not work on Macs.

Tuesday March 5, 2013
4:00 – 6:50 p.m.
Irving Institute Educational Center Classroom (PH10-405B)
622 West 168 Street, Floor 10, Room 405B, NYC 10032

RSVP required to attend Jorge Luna (jl2708@mail.cumc.columbia.edu)

Required readings for attendees:
