

Integrating Special Populations: Seminar Series “Mountains beyond Mountains: Caring for Patients with Congenital Heart Disease in an Era of Improved Survival”

Matthew Lewis, MD, MPH

Assistant Professor of Medicine, Department of Cardiology

Brett Anderson, MD, MBA, MS/POR

Assistant Professor of Pediatrics, Division of Pediatric Cardiology

As part of a new Irving Institute initiative to promote research on special populations across the lifespan, the panelists will discuss the successes and challenges associated with studying and treating a growing population of congenital heart disease patients in the modern era. This seminar will discuss the relative successes in pediatric cardiology / congenital heart surgery and the new challenges that have arisen for longitudinal follow-up for a rapidly growing, heterogeneous, and previously non-existent population of congenital heart disease survivors.

Date: Monday, March 13, 2017

Time: 1pm - 2pm

**Location: Irving Institute Conference Room (PH 10 – Room 204)
622 West 168th Street, 10th Floor, New York, NY 10032**

Preferred RSVP: Dianne C. Frederick, dcf2111@cumc.columbia.edu by March 10
