

Integrating Special Populations: Seminar Series **“Special Issues in HIV Treatment & Prevention Across the Lifespan”**

Claude A. Mellins, PhD

Professor of Medical Psychology

“Cognitive and Mental Health Evaluation and Interventions in Adolescents with Perinatal HIV infection”

Michael Yin, MD, MS

Associate Professor of Medicine

“Understanding Frailty and Aging in HIV”

Magdalena Sobieszczyk, MD, MPH

Associate Professor of Medicine at CUMC

“HIV Prevention Across the Lifespan: Reaching the Young and the Old”

Caroline Carnevale, FNP, MPH

“Engaging and Retaining Young Adults in PrEP care: The Local Experience”

With the introduction of potent and durable antiretrovirals for treatment and prevention, the face of HIV has changed dramatically. In many settings, HIV has evolved into management of chronic disease, and advances in biomedical prevention such as Pre-exposure prophylaxis (PrEP) have changed the dynamics of HIV transmission. As HIV infected patients live longer and PrEP uptake increases, the challenges of optimizing HIV care and HIV prevention across the age groups, from the adolescents, through the middle years to the elderly, comes to the forefront. In this symposium we will discuss special issues unique to delivery of both treatment and prevention across the lifespan: neurodevelopmental and cognitive functioning of perinatally infected children as they move through adolescence; inflammation and aging in HIV; and meeting HIV prevention needs of the young and the elderly.

Date: Thursday, April 27, 2017

Time: 12pm to 1:30pm

Location: Irving Institute Conference Room (PH 10 – Room 204)

622 West 168th Street, 10th Floor

New York, NY 10032

Preferred RSVP: Dianne C. Frederick, dcf2111@cumc.columbia.edu by April 26
