

Integrating Special Populations: Seminar Series Adult Metabolic Diseases Presenting in Childhood

Joel E. Lavine, MD, PhD

Professor and Vice-Chairman of Pediatrics
Columbia College of Physicians and Surgeons

Julia Wattacheril, MD, MPH

Assistant Professor of Medicine at CUMC
Director, Adult Nonalcoholic Fatty Liver Program
Center for Liver Disease and Transplantation – Columbia University/NYP

In a new Irving Institute initiative to promote research across the lifespan, the investigators will discuss, "Nonalcoholic Fatty Liver Disease in Children and Adults: More Than a Tiny Matter". This is the most prevalent chronic liver disease in the United States, in both children and adults. The rapid rise in prevalence associates with the rising prevalence of obesity and other metabolic syndrome co-morbidities. This seminar will compare and contrast the presentation, natural history and treatment across the life span and concerns related to disease specific phenotypes.

Date: December 12, 2016

Time: 1:00 - 2:30pm

**Location: Irving Institute Conference Room (PH 10 – Room 204)
622 West 168th Street, 10th Floor, New York, NY 10032**

Preferred RSVP: Dianne C. Frederick, dcf2111@cumc.columbia.edu by December 9
