Risk-based disease simulation models II: Obesity

Y. Claire Wang, MD, ScD
Assistant Professor
Department of Health Policy and Management

Learning Objectives:
- Recognize applications of simulation methods in multiple levels within the complex systems of the drivers, determinants and solutions of obesity.
- Describe the dynamic processes with regards to simulating weight change following caloric surplus or deficit.

Tuesday February 5, 2013
4pm – 6:50p
Irving Institute Educational Center Classroom (PH10-405B)
622 West 168th Street, Floor 10, Room 405B, NYC 10032

RSVP required to attend Jorge Luna (jl2708@mail.cumc.columbia.edu)

Required readings for attendees:
