

## SEMINAR

# Analyzing omics data using systems biology methods

## Aris Floratos, PhD

Executive Research Director, Center for  
Computational Biology and Bioinformatics

Assistant Professor, Department of  
Systems Biology

### Objectives:

- (a) to explain key methodological underpinnings of some widely adopted network biology analysis approaches; and
- (b) to showcase their power through case studies that have led to high-impact publications.

**Thursday, November 16, 2017**  
**4:00p - 5:00p**  
**622 West 168th Street, 10th floor**  
**PH10-405AB**
