

Shotgun Lipidomics by Ambient Ionization Mass Spectrometry — Direct Characterization of Tissues and Micro-Organisms for Clinical Research

October 19, 2015 • 12:00 pm – 2:00 pm

Irving Institute Educational Center

622 West 168th Street

Presbyterian Building (PH), 10th Floor Room 405A-B

New York, NY 10032

*Presented by Professor Zoltan Takats, Faculty of Medicine,
Department of Surgery & Cancer at Imperial College, London*

Professor Takats has pursued pioneering research in mass spectrometry and he is one of the founders of the field of 'Ambient Mass Spectrometry.' He is the primary inventor of six mass spectrometric ionization techniques and author of 78 peer reviewed publications. He was the recipient of the prestigious Mattauch-Herzog Award of the German Mass Spectrometry Society and the Hungarian Star Award for Outstanding Innovators.

*This event is co-sponsored by the Irving Institute for Clinical
and Translational Research and Waters Corporation.*
